EXPEDITORS AND ALL POINTS PARTNER TO ADVANCE SPACE LOGISTICS AT KENNEDY SPACE CENTER

Nov 18, 2026

Strategic relationship expands warehousing, distribution, and specialized transportation capabilities supporting commercial and government space operations

BELLEVUE, Wash.--(BUSINESS WIRE)-- Expeditors International of Washington, Inc. (NYSE: EXPD) today announced a partnership with All Points Logistics to serve as the exclusive logistics provider for the planned Space Prep Spaceport Logistics Center at Kennedy Space Center in Florida.

Expeditors will establish an on-site presence at the Space Prep facility, providing end-to-end mission logistics for government agencies and commercial space operators. Services for spacecraft, ground support equipment, and related mission materials will include aerospace warehousing, inventory control, transportation management, project cargo services, customs brokerage, supply chain visibility, and launch campaign support. The operation will serve space system operators and manufacturers working at Kennedy Space Center, Cape Canaveral Space Force Station, and other launch locations.

“Companies in the space industry manage highly specialized equipment and materials across global supply chains,” said Ed Rone, Expeditors’ Regional Vice President, U.S. Southeast. “This partnership puts our people and services closer to their launch operations, transforming logistics from a transportation function into a mission-readiness capability that helps ensure critical flight hardware, launch equipment, and operational assets are available at the right time. We look forward to working with All Points and applying our experience to the unique demands of this industry.”

All Points plans to build the 266,000-square-foot Spaceport Logistics Center on its 65-acre site at Kennedy Space Center. The facility will be located within five miles of the launch pads and is scheduled to open by the end of 2027. The site will also include an adjacent 260,000-square-foot Spacecraft Processing Center, bringing together launch-site logistics and specialized spacecraft processing capabilities.

“Expeditors is an ideal partner for our Space Prep business,” said Phil Monkress, CEO of All Points. “Their global logistics expertise and specialized transportation capabilities align directly with the needs of our space industry customers, helping them move, stage, and manage mission-critical flight hardware more efficiently at major launch sites.”

Customers will also have access to Expeditors’ broader global network, connecting suppliers and manufacturing locations with launch operations. The Kennedy Space Center location positions Expeditors to serve existing customers, including hyperscalers, as they explore opportunities in space-based data centers and advanced computing infrastructure.

All Points created Space Prep to develop and operate facilities for spacecraft processing and launch-site logistics. Its planned facilities are intended to provide commercial and government customers with access to payload processing, storage, and mission support services.

About Expeditors

Expeditors International of Washington, Inc. (NYSE: EXPD) is a leading S&P 500 global logistics company headquartered in Bellevue, Washington.
